Objective

Electronics & Communication Engineering graduate with hands-on experience in technology, problem-solving and system development. Seeking an entry-level role to apply my technical skills, learn new technologies and contribute to solving real-world problems.

Skills

- **Programming:** Python and C
- **Engineering Tools:** Xilinx Vivado, Siemens TIA Portal, Vitis, Blynk IoT, ESP8266, Xilinx ZC702 FPGA
- **Core Knowledge:** Digital Electronics, Industrial Automation- PLC Programming, HMI Design, Data Structures & Algorithms, Machine Learning, IoT

Education

NMAM Institute of Technology, Nitte 2022–2026
B.Tech in Electronics & Communication Engineering CGPA: 7.04

Experience

Intern – Sri Shasha Prayathi Technologies Jan 2026–May 2026

- Developed FPGA-based radar waveform generation systems using Verilog HDL and Xilinx Vivado on Zynq-7000 hardware.
- Implemented and verified LFM, Barker, Frank and polyphase coded waveforms for pulse compression applications using functional simulation.
- Performed hardware validation and testing on the Xilinx ZC702 FPGA development platform.

Intern – NITK Siemens Center of Excellence Jun 2025–Jul 2025

- Developed PLC programs using Siemens TIA Portal for industrial automation applications.
- Designed an automated car parking system with vehicle detection, slot monitoring and access control.
- Developed an HMI interface for real-time process visualization, monitoring and control.

Projects

Hardware Acceleration of Multispectral Image Processing Aug 2025–May 2026

- Developed an FPGA-based image processing system for Sentinel-2 multispectral satellite imagery using Python, Verilog HDL and PYNQ-Z2 (Zynq-7000).
- Implemented Min-Max normalization, mean-centering, whitening and Minimum Noise Fraction (MNF) transformation using AXI DMA and pipelined FPGA architecture.

IoT-Based Battery Monitoring System Mar – May 2025

- Developed a lithium-ion battery monitoring system using NodeMCU ESP8266 and Blynk IoT.
- Monitored battery voltage, charging status, and battery level and implemented alerts for abnormal and threshold conditions.

Mallige Mitra – SAP Hackfest 2025 Live Demo ;—; GitHub

- Developed a data-driven platform providing Udupi Mallige farmers with market prices, price trends and a price calculator.
- Selected among the Top 78 teams out of 36,000+ teams at SAP Hackfest 2025.

Certifications & Extracurriculars

Google AI Essentials, Coursera
Google Agile Essentials, Coursera
Social Media Co-Head, HackerEarth Hub NMAMIT
Event Organiser, Incridea'24 (College Fest)
